

brainvisa-development - Defect #2652

bv_maker can fail if configuration is done through a symlink

05/05/2011 06:13 PM - Cointepas, Yann

Status:	Closed	Start date:	05/05/2011
Priority:	Normal	Due date:	
Assignee:	Cointepas, Yann	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:	brainvisa-4.6	Spent time:	0:00 hour
Resolution:			

Description

Using a build directory containing a symlink to the actual build-directory can make configuration fail. When testing if a share directory should be removed, there is a comparison between two directories that can be different only because a symlink was used in a previous configuration. In that case brainvisa-cmake shoot himself in the foot by removing a directory that is necessary for configuration.

History

#1 - 31/07/2015 03:51 PM - Cointepas, Yann

- Target version changed from development-trunk to brainvisa-4.5

#2 - 31/07/2015 04:08 PM - Cointepas, Yann

- Assignee set to Cointepas, Yann

#3 - 03/08/2015 11:18 AM - Cointepas, Yann

- Target version changed from brainvisa-4.5 to brainvisa-4.6

#4 - 26/09/2017 03:45 PM - Riviere, Denis

- Status changed from New to Closed
